SUMMARY

Machine Learning Engineer and Software Developer specializing in building production-ready AI systems and scalable applications. Experienced in deploying deep learning models, integrating intelligent pipelines into real-world products, and delivering end-to-end solutions across web and backend systems. Strong at bridging technical development with project execution and client communication. Proficient in Python, Java, C++, JavaScript, and modern ML frameworks with a focus on performance, clean architecture, and real-world impact.

EDUCATION

GIKI (Ghulam Ishaq Khan Institute of Engineering Sciences & Technology)

2023 - Present

BS, Software Engineering

- **Coursework:** Operating Systems, Software Design & Architecture, Data Structures and Algorithms, Databases, Artificial Intelligence, Deep Learning, Web Engineering, Design and Analysis of Algorithms, Software Engineering, Software Requirements Engineering, Digital Logic Design, Probability & Statistics, Discrete Mathematics, Computer Organization and Assembly Language

Punjab College, Gujranwala

2020 - 2022

FSc, Pre-Engineering

- **Coursework:** Mathematics, Physics, Chemistry

PROJECTS

Explainable Multimodal Medical Diagnosis System

- Built an explainable multimodal deep learning model combining chest X-rays and clinical text (CNN + BERT).
- Designed fusion pipeline and preprocessing system for aligned image-text learning.
- Improved performance using class imbalance handling and evaluation with F1-score & ROC-AUC.
- Integrated Grad-CAM and attention-based explanations with a clean web interface for end-to-end predictions

Looks Maximizer – AI Powered Facial Analysis & Recommendation System

- Deployed production AI web app (Vercel frontend, Railway backend).
- Built multi-model ONNX inference pipeline (3 CNNs, CPU-only execution).
- Converted PyTorch models to ONNX, achieving <3s inference and reduced memory usage.
- Developed tooling for ONNX model stabilization in stateless deployments.

Intelligent Resume & Career Advisor - NLP-Based Recommendation System

- Built AI resume-job matching system using BERT, SBERT, and TF-IDF embeddings.
- Implemented multi-format resume parsing with validation and filtering.
- Designed skill gap analysis engine with personalized learning recommendations.
- Developed Streamlit interface for job matching and career insights.

MindMate - AI Integrated Mental Wellness Platform

- Built full-stack platform using Spring Boot (backend) and React (frontend).
- Integrated CNN-based facial emotion recognition via Python microservice (FER-2013).
- Applied design patterns (Strategy, Factory, Observer) for scalable architecture.
- Implemented JWT authentication with role-based access control.

E-Commerce Store (Full Stack)

- Built a full-stack platform using Tailwind CSS, Node.js, Express.js, and PostgreSQL.
- Implemented authentication, product catalog management, and secure DB integration.
- Later sold for commercial use in a local electronics shop.

TECHNICAL SKILLS

- **Languages:** C++, Python, Java, JavaScript, SQL, NoSQL, C
- **Frameworks & Libraries:** TensorFlow, scikit-learn, NumPy, Pandas, OpenCV, Flask, PyTorch, Pypfot, Node.js, Express.js, Restful APIs
- **Machine Learning Techniques:** Regression & Classification, Neural Networks (CNNs, RNNs), Random Forests, Gradient Boosting, Decision Trees, NLP, Transfer Learning, Feature Engineering, Model Evaluation, Performance Tuning, Data Augmentation, Reinforcement Learning (introductory), Model Optimization
- **Tools:** Jupyter Notebook, Git, Google Colab, Tesseract OCR, VS Code, Linux Kernel, Data Pipelines, Jira
- **Concepts:** Software Engineering Principles, SDLC, Software Architecture, Databases, AI & Automation, HCI, Privacy-Preserving Systems, Model Deployment and Optimization, OOP

CERTIFICATIONS

- Machine Learning Specialization: Stanford / DeepLearning.AI
- Deep Neural Network: DeepLearning.AI

ACHIEVEMENTS & LEADERSHIP

- Sold a database-driven e-commerce project for real commercial use.
- Conducted C++ programming workshops at GIKI, mentoring junior students.
- Represented GIKI in the ICPC National Programming Contest.
- Recognition in Robotics and Mathematics competitions at college.
- ACM Society Management Head - Organized and hosted Softcom, a flagship tech event.
- SOPHEP Society Sponsorship & Liaison Head - Secured 1M+ PKR sponsorships from national firms.
- Mission Smile (Co-Founder) - Welfare initiative helping underprivileged communities.
- Active in speech, quiz, and robotics competitions, fostering a well-rounded profile.
